Portfolio: https://as-portfolio-ten.vercel.app/

Objective

Passionate and detail-oriented Frontend Developer with expertise in HTML, CSS3, and JavaScript (ES6). Proficient in modern frameworks and libraries including React.js, Next.js, and React Router, with a strong ability to create responsive and dynamic user interfaces. Experienced in utilizing Axios for API integrations, and skilled in both Bootstrap and Tailwind CSS for streamlined styling. Adept at version control using Git, and knowledgeable in TypeScript to enhance code quality and maintainability. Committed to delivering exceptional user experiences through the use of Material UI and Shadcn UI components. Seeking a challenging role to leverage my skills in a collaborative environment, driving innovative web solutions that align with user needs and business goals.

Experience

Web Site for Company | Freelancer

- Make it by React.js and Bootstrap for styling
- Use React Router To facilitate navigation between pages
- Deploy it in vercel to test it

Education

Benha university

Student

Skills & abilities

- Proficient in creating **responsive web applications** using **HTML**, **CSS**, and **SASS**, with styling frameworks like **Bootstrap** and **Tailwind CSS**.

- Skilled in modern **JavaScript libraries and frameworks**, including **React.js**, **React Router**, **React Hooks**, **Material UI**, and **TypeScript**.

- Experienced in using **Git** for version control and effective collaboration with other developers.

- Knowledgeable in building dynamic and scalable web applications using **Next.js**.

- Familiar with backend technologies such as **Node.js**, **Express.js**, **RESTful APIs**, **JWT (JSON Web Tokens)**, and **MongoDB**.

- Knowledgeable in working with Ant Design & Daisy UI is a set of high-quality React components and a UI design language for web applications

- Knowledgeable in working with Prisma provide best experience to work and interact with databases

- Proficient in using **Microsoft Office programs** such as **Word**, **Excel**, and **PowerPoint** for documentation, data handling, and presentations.

Job Duties:

➢ Add new Features, Debug & refactor the User App Ordering project that coded with the React Js, Typescript, and React Router.

➢ Collaborated with the frontend team to identify areas of improvement in the existing codebase and implemented solutions using best practices and design patterns.

➢ Developed new features and enhancements as per the project requirements, while ensuring that the code is maintainable, scalable, and efficient.

➢ Conducted code reviews, identified bugs and issues, and fixed them in a timely manner.

➢ Ensured that the code is compatible across different browsers and devices.

Certificates:

- Frontend Web Development in GDSC **Mar 2024 – Sep 2024** ➚

- C++ Track in GDSC **Mar 2024 – Sep 2024** ➚

- TypeScript Core Concepts in Mind Luster **Jan 2024 – Feb 2024** ➚

Courses:

- Full stack web development (MERN) **(Mag Camp)**
- TypeScript Core Concepts (Mind Luster)
- Next Js Complete course (YouTube)

Projects:

❖ <u>El-Bash Mo3alem– The Educational Platform</u> ➤

Welcome to Al-Bash Mo3alem – a powerful and modern educational platform built for teachers. This repository contains the complete source code of the platform, developed using Next.js, Tailwind CSS, and MongoDB. It features a responsive, user-friendly interface and a secure backend architecture that enables teachers to manage courses, upload books, host live classes, communicate with students in real-time, and handle payments with ease. The platform is optimized for performance, security, and scalability—designed to streamline digital education.

- ****Next.js** –** Framework for server-side rendering and full-stack development
- ****React.js** –** Frontend library for building dynamic UI
- ****Tailwind CSS** –** Utility-first CSS framework for rapid design
- ****MongoDB** –** NoSQL database for storing users, courses, books, and
- ****Socket.io** –** Real-time chat and communication between users
- ****Jitsi Meet** –** Embedded video conferencing for live classes
- ****Cloudinary** –** Media upload and optimization
- ****Node.js & API Routes** –** Backend logic and secure API integration

❖ Ecommerce-ZOOZ ➚

E-Commerce Platform Overview A comprehensive and modern e-commerce platform built using the latest web technologies, offering a seamless experience for both customers and administrators. The application features a dynamic storefront for users to browse, search, and shop for products, as well as a powerful admin dashboard for managing all aspects of the business.

- **Tech Stack:** Frontend Next.js – Fast and SEO-friendly React framework.

- **Tailwind CSS + Daisy UI** – Utility-first styling with prebuilt components.

- **Backend Node.js** – Server-side JavaScript runtime.

- **Express.js** – Fast and minimalist web framework.

- **Database MongoDB** – NoSQL database with flexible schema.

- **Mongoose** – Elegant ODM for MongoDB.

- **Payment Integration Stripe** – Secure and easy-to-use payment gateway.

- **Integrations JWT** Authentication – Secures routes and user sessions.

- **Cloudinary** – Image upload and optimization.

❖ AS-portfolio (My Portfolio) ➚

Welcome to my personal portfolio website, showcasing my skills and projects as a passionate Full stack Developer. This repository contains the source code for my portfolio website, built using Next.js, Tailwind CSS, and Daisy UI. The site includes a sleek, user-friendly design with dynamic theme capabilities and various features to highlight my work and expertise.

- **Next.js:** A React framework for building the website with a focus on SEO and server-side rendering.

- **Tailwind CSS:** A utility-first CSS framework for fast and efficient styling.

- **Daisy UI:** An accessible and customizable component library for React to style UI elements.

- **MongoDB:** A NoSQL database used for storing subscription data.

- **Pure CSS:** For custom styling and design.

- **Clerk/Next.js:** For authentication and user management.

- **Node.js:** For backend development.

- **MongoDB with Node.js:** For handling database operations.
